SUMMARY

Business Analyst with experience applying data analysis, business intelligence, and predictive modelling to solve business problems and support decision-making. Skilled in SQL, Python, Power BI and Excel, with experience analysing operational and customer data, developing interactive dashboards, and translating findings into practical recommendations.

TECHNICAL SKILLS

Business Analysis: Requirements Gathering & Analysis, Process Mapping, BPMN, User Stories, Acceptance Criteria, Gap Analysis, UAT, Stakeholder Analysis

Data & BI: SQL, Power BI, Advanced Excel, Data Analysis, Business Intelligence & Reporting

Programming & Analytics: Python (Pandas, NumPy, Scikit-learn), R, Data Cleaning, Feature Engineering

Predictive Analytics & ML: Classification, Predictive Modelling, Model Evaluation, Imbalanced Dataset

Analysis Tools & Delivery: Jira, Confluence, Microsoft Visio, Scrum, Microsoft Office, Google Workspace

PROFESSIONAL EXPERIENCE

Business Analytics Intern | Edinburgh Dog and Cat Home (EDCH)

Edinburgh, United Kingdom

June 2026 – August 2026

- Analysed 53,690 postcode records against the Scottish Index of Multiple Deprivation (SIMD), identifying a 30-percentage-point gap between pet surrender cases from the most deprived communities (45%) and financial supporters (15%).
- Developed 3 interactive dashboards using Python, HTML, JavaScript and SVG to analyse service performance, geodemographic patterns and operational trends, with matched-period KPI analysis for year-on-year comparison.
- Identified a 39% decline in rehoming applications and 67% increase in stray admissions through operational trend analysis, presenting findings and recommendations to stakeholders to improve service planning and impact measurement.

Associate | International Elite Capital (IEC)

New York, United States

Dec 2022 – Jan 2026

- Conducted company and investor data research to identify business development and investor-relations opportunities.
- Validated and maintained prospect data, improving contact accuracy and supporting targeted outreach.
- Supported AI-enabled research and workflow improvements to streamline company and investor intelligence processes.

Projects

Credit Risk Default Prediction | Python, TensorFlow, scikit-learn | [[GitHub](#)]

- Analysed 10,000 simulated loan applications to predict borrowers at risk of missed repayments, estimating a 42% reduction in expected lending losses (£3.60m to £2.10m).
- Tested model performance under different business scenarios, estimating savings of 28%–55% when loss assumptions changed.
- Recommended a simpler, more explainable approach after demonstrating comparable performance to a more complex model, supporting transparent lending decisions.

EDUCATION

MSc Business Analytics with Artificial Intelligence

University of Dundee

Relevant areas: Business Analysis, Predictive Analytics, Machine Learning, Business Intelligence, Data Analytics

BSc. Local Government Administration

Obafemi Awolowo University, Nigeria

Relevant Modules: Statistics, Business, Economics

PROFESSIONAL QUALIFICATION

Chartered Accountant (ACA) | Institute of Chartered Accountants of Nigeria (ICAN)

2024

AAT Certified | Association of Accounting Technicians

2022

CERTIFICATIONS

Google Advanced Data Analytics | Google

Agile Project Management | Google

Data Analytics Bootcamp | Digitaley Drive

Python Programming Bootcamp | Digitaley Drive
